DETAILED ACTION

Response to Amendment

The following is in response to the amendment filed December 17, 2009.

Allowable Subject Matter

Claims 1-13, 15, and 18-21 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1-13 are allowed, because in a forming sieve for the wet-end of a paper machine having paper side thread floats or knuckles reshaped by means of temperature, pressure, and/or moisture, the prior art does not disclose or suggest any one or a combination of: the thread inflection shape, the width of the thread floats and knuckles, the height of the thread floats and knuckles, the degree of ellipticity of the threads, the total contact area of the sieve, and the void size lying between the threads varying across each point of the sieve's width.

Claims 15 and 18-20 are allowed, because in a method of forming a sieve for the wet-end of a paper machine having paper side inflection regions permanently reshaped by calendering with a plurality of rollers, the prior art does not disclose or suggest providing at least one roller formed from a plurality of segments that can be individually adjusted to change the pressure exerted by the roller and obtain a sieve with a tailored cross-sectional profile across its width.

Claim 21 is allowed, because in a method of forming a sieve for the wet-end of a paper machine having paper side inflection regions permanently reshaped by calendering with a plurality of rollers, the prior art does not disclose or suggest providing at least one roller that can

Art Unit: 1791

be heated such that the temperature can be changed along the length of the roller to apply a specific profile to the sieve.

Response to Arguments

Applicant's argument filed December 17, 2009 have been considered. By way of amendment, Applicant has overcome the rejections set forth previously under 35 U.S.C. 102(e) over Nilsson et al (US 7,514,030), under 35 U.S.C. 102(b) over Gstrein et al (WO 97/01431), and under 35 U.S.C. 102(b) over Cedercreutz (GB 2012327).

Drawings

The replacement drawings were received on December 17, 2009. These drawings are acceptable.
